Dear All,

Please browse through the 48 generations of the Jervis family. Information is being added all the time so make sure you check back regularly for updates. Currently I have uncovered close to 5,500 ancestors.

In addition to the Jervis family I have now included a further 3 trees; one for each of my remaining grandparents. Each tree contains 9 generations of family members. Where possible I have included references to the UK censuses, GRO index and Burke's LG.

Do please contact me if you are willing to exchange GEDCOM files and finally, happy hunting to you all.

Helen
